ACOUSTIC--BRADFORD

CSR Bradford's SoundScreen™ is an Australian made product that provides superior acoustic insulation benefits with added thermal benefits to make your home more comfortable. Including SoundScreen™ in interior walls can greatly reduce the transmission of noise between rooms, allowing you to get the peace and quiet you deserve without cramping the rest of the family's style.

FLEXITEL

Tel: (02) 88074717, SPARK BUSINESS GROUP, INSULATION BUILDERS PRICE LIST

Bradford Flexitel is suited to external and internal insulation of ductwork, plenums and risers.

Flexitel greatly reduces heat gains or losses through the duct walls so that energy costs are reduced and conditioned air reaches the outlet at the required temperature. Flexitel comes in a range of thicknesses and sizes.

WALL WRAPS

Tel: (02) 88074717, SPARK BUSINESS GROUP, INSULATION BUILDERS PRICE LIST

Reflective foil laminates require an air cavity adjacent to the reflective surface in order to generate an air-gap R-Value. Where the stud frame is filled with bulk insulation making contact with the wall wrap or the cavity between the wall wrap and the external cladding is eliminated, the wall wrap is unable to provide an air-gap R-Value.

SPECIALITY BLANKET

Anticon Roofing Blanket is designed to provide efficient thermal insulation and condensation control under metal deck, fibre cement and concrete roofs. in residential or commercial applications. The name “Anticon” reflects the anti---condensation function of this product.

Bradford Anticon is foil-faced insulation blanket specifically designed for temperature & noise control in homes and buildings with metal roofs.

It is comprised of a glasswool blanket adhered to an impermeable reinforced reflective foil facing. This reduces radiant heat entering a home during summer, and helps prevent condensation in winter

BRADFORDBRADFORD THERMOGARD						
		Thermoguard is designed to provide a combination of thermal break and general purpose insulation blanket in one product. The product material R value of R0.32 was designed to exceed the BCA Thermal Break requirements.				
BRADFORDAGRICON ROOFING BLANKET						
		Agricon is designed to provide efficient thermal insulation and condensation control under metal deck, FC sheet and concrete roofs in agricultural & animal husbandry buildings. The Polyweave is designed to protect and allow washing down of the surface.				
BRADFORDASHGRID SPACERS						
		Bradford Ashgrid Spacers use a modular bar and bracket to elevate the roof sheet above the purlin to create space for the insulation to recover to its design thickness in accordance with the BCA. Contact your local AGI office for pricing.				

BRADFORDSAFEBRIDGE ROOFING SYSTEM		
		SafeBrdige Roofing System utilises the depth of the purlin and the position of the bridge bar to create exactly the right amount of space to ensure BCA compliance whilst creating a safer environment for workers. Contact your local AGI office for pricing

EDMINS AIROMATIC			
	AiroMatic is a dual purpose ventilator, which can be used to cool a roof space on hot days via its new temperature sensing inverter speed control technology, or it can be set for constant ventilation rates		
	to help reduce condensation build up in the roof space

WALL SYSTEMS 2

Cavity wall insulation can be installed in most double brick homes during or after construction to greatly increase energy efficiency and reduce space heating costs. The insulation material creates thermal mass within the walls to prevent heat transfer through convection, keeping households cool in summer & warm in winter.

FOAM BOARDS

The AGI range of Rigid Foam Boards are made from EPS (Expanded Polystyrene) and XPS (Extruded Polystyrene) in a variety of finishes. The Foam boards are used to insulate under ground

Tel: (02) 88074717, SPARK BUSINESS GROUP, INSULATION BUILDERS PRICE LIST
slabs and exposed soffit slabs. The rigid foam boards are also a cost effective option as a cavity wall insulation in both double brick and brick veneer wall structures.

PIRMAX

PIRMAX PIR Rigid Boards are made of light weight closed cell Polyisocyanurate Foam Core panels bonded to highly reflective foil facings. PIRMAX products achieve a Group 1 rating when tested to AS/NZS 3837:1998 and are NCC/BCA compliant with a thermal value of 0.0208 W/mK. PIRMAX are manufactured to ISO 9705 and complies with AS/NZS 4859.1 The PIRMAX PIR Rigid Board is CFC/HCFC free with Zero Ozone Depleting Potential (ODP) and contains Zero Volatile Organic Compounds (VOC's). Available with Tissue or Foil Facing.

Xtratherm XtroLiner Duo is a high performance insulation that achieves significant thermal performance in a slimline, rigid board profile. Xtratherm XtronLiner Duo's special inner core is an advanced thermoset polyisocyanurate (PIR) foam which is sandwiched between two layers of embossed aluminium foil facings. With standard embossed aluminium on one side and an embossed aluminium with pre---finish white paint coating on the other.
