

# SPARK HOMES AUS PTY LTD

## INSULATION PRICE LIST 1ST JUNE 2026

Please Note:

Prices are subject to change without notice. The ruling price is at the date of DESPATCH.

### Returned Goods Policy

Goods returned will only be credited if the following is observed:

- 1 Goods are in a resellable Condition - As new - at our discretion
  - 2 Is a stocked item, not an item that has been specially ordered or modified, faced or cut to length.
- A 25% Restocking fee will apply to all returned goods.

### When ordering please provide the following information on your company letterhead:

- 1 Order Number
- 2 Product Required & Quantities of each
- 3 Delivery Address - Store or Site Special Delivery Instructions (if Any)
- 4 Special Delivery Instructions (if Any)
- 5 Contact person on site
- 6 Contact persons phone number
- 7 Delivery Date

1. Prices are subject to change without notice. The ruling price is at the date of DESPATCH.

### Delivery Fee Structure

Deliveries to sites will incur a \$180 + GST fee.

\*\*\* Prices are for Sydney Metro Areas only, contact our office for pricing on Regional deliveries\*\*

## Wall Wrap

Specifically designed as a wall underlay on both residential and commercial buildings with absorbent wall claddings (e.g. timber, brick or fibre cement) or non-absorbent wall claddings (e.g. metal or plastic). Made from synthetic materials Watergate Plus is fire retardant, water resistant and vapour permeable. The water vapour transfer rate of the product has been optimised to minimise condensation risk in homes without compromising its primary water barrier properties.

Its unique construction allows for easier installation while maintaining best in class performance qualities. It will provide temporary weather protection during construction. (Max 90 Days)

## Consolidated Energy Insulation - Acoustic

CE Acoustic combines the benefits of thermal insulation with extra density, to provide an insulation that reduces  
noise transfers in your home, as well as keeping you comfortable. It can be used in external and internal walls,  
ceilings and mid-floors to meet energy efficiency regulations.

## Kingspan K17 Insulated Plasterboard

Kingspan Kooltherm K17 Insulated Plasterboard is a fibre-free rigid thermoset, closed cell phenolic insulation, sandwiched between a front facing of tapered edge gypsum based plasterboard, and a reverse tissue based facing adhesively bonded to the insulation core during manufacture. Kingspan is renowned among plasterboard suppliers for its superbly insulated thermal plasterboard sheets. Alternative lining boards, such as fibre cement sheets, can also be bonded to the insulation core to create customised finishes and facings in our Kingspan Kooltherm K17 + Insulated Lining Board range.

## Kingspan K3 Floor Board

Kingspan Kooltherm® K3 Floorboard is a fibre-free rigid thermoset closed cell phenolic insulation core, sandwiched between two layers of tissue based facing adhesively bonded to the insulation core during manufacture. It can be used under concrete slabs and is ideal for both new build and renovation projects.

## Kingspan K12 Framing Board

Kooltherm K12 Framing Board is a fibre-free rigid thermoset phenolic insulation, faced on both sides with foil adhesively bonded to the insulation core during manufacture. This reflective surface improves the thermal resistance of any cavity adjacent to the board. If correctly applied, Kooltherm® products can be expected to have a long life of service. Their durability depends on the supporting structure and the conditions of its use. Kingspan K12 is warranted for a period of 10 years for both residential and commercial installations, subject to the terms of the complete Kingspan Kooltherm® warranty document.

## Kingspan K10+ Insulated Fibre Cement Soffit Board

Kooltherm K10 PLUS Soffit Board is an insulated fibre cement board with a non-combustible building board outer face and is NCC and AS/NZS 4859.1:2018 compliant and Group 1 fire rating. With an impact-resistant, fibre cement outer face, Kooltherm K10 PLUS Soffit Board is an easy to install, thin solution for ceiling insulation.

## Bradford Wall Wrap

Reflective foil laminates require an air cavity adjacent to the reflective surface in order to generative an air-gap R-Value. Where the stud frame is filled with bulk insulation making contact with the wall wrap or the cavity between the wall wrap and the external cladding is eliminated, the wall wrap is unable to provide an air-gap R-Value.

## Bradford Commercial Polyester

Martini MABTM

Martini MAB can be used behind perforated panelling and ceilings to reduce echo in a single space such as sports halls, cinemas, studios and industrial enclosures and as a cavity infill where noise separation through walls and ceilings is required. Martini MAB is subject to minimum order quantity. Standard polyester colour is white. Black and grey colour available upon request. Standard manufacturing lead time is 5 working days for East Coast, 8 working days for all other areas.

## Bradford Supertel Faced

Bradford Glasswool Supertel is also available with a range of factory applied facings. Depending upon which facing product is chosen it can offer a combination of acoustic, thermal and moisture control for commercial air conditioning and acoustic enclosures. Note: The optional perforated (Perf) facing does not control condensation or moisture.

## Bradford Flexitel

Bradford Flexitel™ is suited to external and internal insulation of ductwork, plenums and risers. Flexitel™ greatly reduces heat gains or losses through the duct walls so that energy costs are reduced and conditioned air reaches the outlet at the required temperature. Flexitel™ comes in a range of thicknesses that meet the performance requirements as set out by the Building Code of Australia.
