Trailer Options to suite any size

Trailer Options & Mobility Solutions

We can provide trailers suitable for the units. One option is a **stand-alone trailer** designed for stationary placement, and the other is a **road-worthy trailer** suitable for transportation. Please let us know which type of trailer you require, and we can provide pricing accordingly.

Frequently Asked Questions (FAQ's) No: 1

Pricing & Purchase

Q1: What is the price of a container home?

Each model has a base price based on the selected floor plan. An option sheet allows you to add upgrades or remove items to estimate the final cost according to your requirements.

Q2: Can we buy DIY kits?

Yes, DIY kits are available for customers who prefer to assemble the unit themselves.

Q3: Can we rent the units?

Yes, selected models are available for rent. Please contact us for the current rental price list.

Q4: Do you offer rent-to-own options?

Yes, rent-to-own options may be available and can sometimes be more affordable than traditional renting.

Q5: Do you offer financing options?

Yes, we may assist with financing options. Please contact us for more information.

Transport & Expansion

Q6: Are the units transportable?

Yes, most standard models are transportable and can be delivered to your site.

Q7: Can the units be relocated later?

Yes, transportable models can be relocated if required.

Q8: Can multiple containers be joined together?

Yes, multiple units can be connected on site to create larger living spaces.

Q9: Can container homes be stacked to create multi-storey buildings?

Yes, units can be engineered and stacked to create multi-storey structures.

Q10: Can I expand the home later?

Yes, the modular design allows additional units to be added in the future.

Delivery, Access & Installation

Q11: Are delivery and installation included in the price?

Delivery, transportation, and installation are not included in the base price and are arranged at an additional cost depending on the site location and conditions.

Q12: Do we need proper access for delivery?

Yes, proper site access is important for delivery and installation. If access is limited, larger cranes or specialised equipment may be required which can increase the delivery cost.

Q13: What does installation involve?

Installation generally includes preparing footings or piers and connecting utilities such as electricity, water, and sewer services.

Q14: How far can the units be delivered?

Units can be delivered to most locations across Australia.

Frequently Asked Questions (FAQ's) No: 2

Construction & Materials

Q15: Are the units insulated?

Yes, all units are fully insulated using high-quality EPS insulated panels for improved comfort and energy efficiency.

Q16: How are the containers constructed?

Units are built with strong steel chassis frames and insulated panels designed for durability and thermal performance.

Q17: Are these real shipping containers?

No, these are not repurposed shipping containers. They are prefabricated modular units designed to resemble container structures and are built using highly insulated panels.

Q18: Are the containers weather-resistant?

Yes, they are designed to withstand harsh weather conditions including strong winds, heavy rain, and extreme temperatures.

Q19: Can they be used in cyclone or earthquake-prone areas?

Yes, they can be engineered to meet structural requirements for high-wind and seismic zones.

Features & Inclusions

Q20: What fittings are included as standard?

Standard units typically include doors, aluminum windows with locks and flyscreens, LED lighting, and electrical outlets.

Q21: Are double-glazed windows available?

Yes, double-glazed windows and doors are available as optional upgrades.

Q22: How are the units heated and cooled?

Due to their insulation, a small heater or air-conditioning system is usually sufficient for year-round comfort.

Customisation & Design

Q23: Can the models be customised?

Yes, models can be customised in layout, size, materials, and finishes.

Q24: Can the ceiling height be increased?

Yes, ceiling heights can be customised depending on design requirements.

Q25: Can exterior cladding be added?

Yes, a range of exterior cladding options are available to enhance the appearance and insulation of the unit.

Q26: Can I add a veranda, pergola, or deck?

Yes, outdoor additions such as decks, pergolas, and verandas can be included during the design stage or added later.

Frequently Asked Questions (FAQ's) No: 3

Utilities & Off-Grid Options

Q27: How are utilities connected?

Electricity, water, and sewer systems are connected similarly to traditional homes.

Q28: Do you offer off-grid options?

Yes, solar-ready systems and off-grid solutions can be provided if required.

Q29: Do you offer compost toilet options?

Yes, compost toilet systems can be supplied for off-grid or eco-friendly installations.

Uses & Applications

Q30: Can container homes be used as granny flats?

Yes, they are commonly used as granny flats or secondary dwellings, subject to local council approvals.

Q31: Can they be used as main residential houses?

Yes, they can be designed and built as full residential homes, subject to local council approvals and building regulations.

Q32: Are they suitable for Airbnb or holiday rentals?

Yes, many customers use them for Airbnb accommodation, holiday cabins, or farm stays.

Q33: Can they be used for commercial purposes?

Yes, they can be used for offices, cafés, classrooms, site offices, retail spaces, or other commercial applications.

Q34: Can they be used as temporary housing?

Yes, they are ideal for temporary accommodation, worker housing, or emergency housing.

Trailer Options & Mobility Solutions

Q35: Can you provide a trailer to suit the model?

A: Yes, we can provide trailers suitable for the units. One option is a **stand-alone trailer** designed for stationary placement, and the other is a **road-worthy trailer** suitable for transportation. Please let us know which type of trailer you require, and we can provide pricing accordingly.

Benefits of Container Homes

1. Strength and Durability

Container homes are built to withstand extreme weather conditions, including snow, high winds, hurricanes, tornadoes, and even earthquakes. Their solid steel construction ensures long-lasting durability.

2. Same-Day Move-In

Our containers are custom-designed to meet your specific requirements and preferences. Pre-plumbed, pre-wired, and fully assembled, they can be delivered ready to use. As long as water, electricity, and sewer/septic connections are available onsite, the container can be installed, secured, and hooked up the same day—allowing you to move in that evening.

3. Low Maintenance

For minimal upkeep, we offer metal and vinyl siding options. With a metal roof and siding, external maintenance is virtually eliminated. This is ideal for lake cabins, hunting lodges, or vacation homes, allowing you to focus on enjoying your time away without worrying about repairs. Metal options ensure durability and eliminate concerns about wood rot or replacing siding.

4. Termite and Insect Resistance

The only wood in the container is the treated, weather- and insect-resistant 18mm thick, 19-ply plywood flooring. The walls are made of solid steel, preventing termites or other pests from causing damage. Openings for doors and windows are fully insulated, caulked, and sealed to keep out insects, rodents, and weather. Even in the middle of the woods, your container cabin remains safe and secure from pests.

5. Designed for Transport

Containers are specifically engineered for transport. Whether you use your own contacts or let us assist you, we can help arrange delivery and placement on your site. If you have the necessary equipment, you can even pick up and transport the container yourself. Alternatively, placing your container in a local mobile home park is an excellent option, as utility services are already established.

6. Versatile Applications

Our containers are not just for homes—they're perfect for a range of projects, including:

Schools. Holiday homes, Restaurants, Warehouses, High-rise designer hotels, Commercial projects

Contact Us for Larger Projects, Discuss your vision for large-scale projects with us, and let's explore how container solutions can meet your needs. Whether it's a unique commercial venture or a customized community project, we're here to help.
