Installation guide for Spark Business Group (3 or 4) panel flat pack showers.

Please read the entire guide prior to commencement of assembly or installation.

Note that this guide is provided for general information purposes only and should not be relied upon without professional advice about your personal situation and installation requirements. As this guide does not take personal circumstances or local regulations into account and as any installation is beyond the control of Spark Business Group, no responsibility is accepted nor warranty implied by Spark Business Group (or its affiliated entities) by the publishing or use of this guide.

Spark Business Group flat pack bathrooms are manufactured in our modern production facilities and are supplied ready for assembly and installation.

If you have sufficient access to be able to manoeuvre a fully assembled 'single piece' shower unit to the installation area, you may find it more convenient to install one of our single piece moulded showers.

Follow this simple guide and your Spark Business Group shower should give you many years of trouble free service. No leaks, no cracks, no maintenance.

No specialised tools are required to install an Spark Business Group flat pack bathroom. Installation of a bathroom usually requires 2 competent people.

All plumbing work must be performed by appropriately licensed contractors.

Flat pack showers are normally supplied as either 3 or 4 panels with pre-drilled bolt holes and fasteners. Before commencing installation open packaging and ensure all items are correct and in acceptable condition. No claims regarding damage or missing components can be entertained after assembly commences.

Line up and identify all panels so as to facilitate assembly. Check quantity of nuts, bolts, washers etc. Ensure sufficient suitable sealant is available; this may be included with your shower depending upon individual order.

Clean and maintain your new Spark Business Group shower with domestic grade non-abrasive cleaning agents. Walls may be polished with automotive or marine polishes suitable for use on fibreglass. Ensure polishes, silicone washes, waxes and the like are kept away from any shower floor as such products may be slippery.
