

SPARK Stack A Stone

Stone Age Engineering

About Stack-A-Stone

Our products look and feel like natural stone without the additional weight and higher installation costs. The stones we make are cast in molds made from natural stone. We offer a variety of standard colours and the option to customize to meet your taste and design needs.

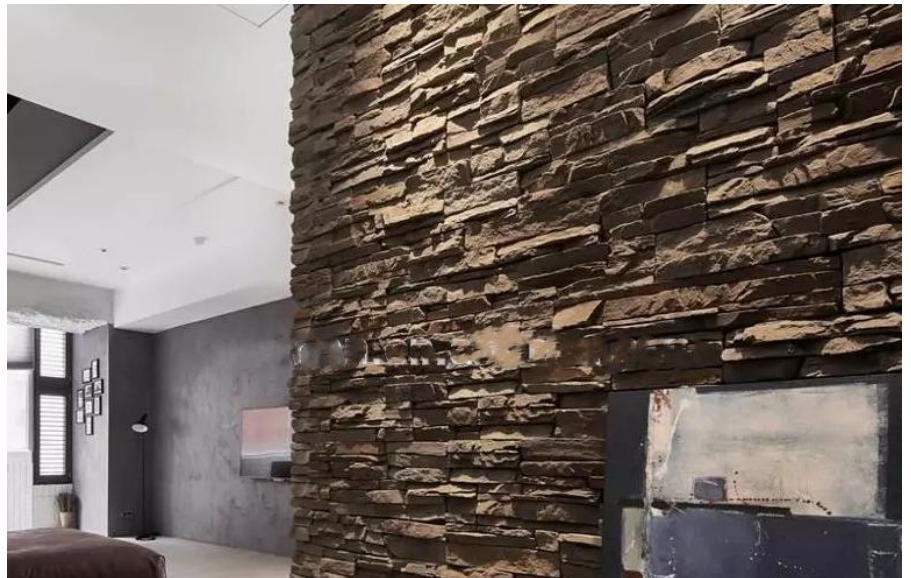

Used in: Interior and exterior decoration, such as hotels, commercial, residential villas, homes, bars, shopping malls, parks, gardens, cafes, apartments, restaurants, etc.

Advantage of our Stack A Stone

Colour Stone and Design are customizable , we can make any color according your requirement.

Call us to discuss how you can add value to your project through the timeless beauty of SPARK stone aged engineering cladding.

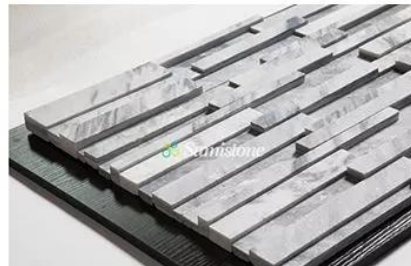

Split Surface

Honed Surface

Advantage:

1. Light weight with beautiful natural texture
2. Less cutting and waste
3. Easy installation
4. Weather Resistance
5. Fireproof
6. non-slip
7. Convenient to clean
8. Do not fade, the longer the time, the brighter the color
9. frost resistance,
10. sound insulation
11. eco-friendly
12. product can adapt to the vast majority of extreme weather
13. 100 % natural Slate
14. Easy to paste, effectively shorten the construction period
15. Light weight, greatly reduced transportation cost
16. The texture is real, close to the natural stone.
17. Changeable style, and the building is endowed with different styles
18. Research and development personnel can design a variety of artificial cement cultural stone wall bricks. As long as customers have ideas, we have action
19. German pigment, high quality guarantee.

Technical Details:

NAME: Spark Stack A Stone

Material: 100% Natural Slate

Irregular: like natural stone

Length: 50-520 mm

With: 30-200mm

Thickness 30-200

Colour: Multicolour, yellow, tiger skin yellow beige, white, black, pink, green, grey rust and any thing else can be customized.

Available in a range of different styles and colours, SPARK Stack A Stone products are well suited to residential and commercial applications. With a nationwide network

- 1.SPARK Stack A Stone veneers can be bonded onto most materials that act as a solid backing, e.g. fibre cement sheet, concrete block, concrete, bricks & various lightweight concretes.
2. For residential and commercial cladding we recommend using an experienced installer. For other applications such as garden walls SPARK Stack A Stone profiles are so simple to lay that any competent tradesman or home handyman should have no trouble.
3. All surfaces must be clean and dry. Any paint must be removed and walls cleaned back to the base material. Concrete surfaces should be scabbled to provide a rough surface for the Sparkbond to adhere to.
4. All masonry and fibre cement surfaces must be sealed with SPARK Stack A Stone Sealer which is a specially formulated proprietary product only available from SPARK Stack A Stone NZ. Always follow the manufacturer's instructions.
- 5.To bond to the substrate the only suitable product is Sparkbond mortar adhesive which is a specially formulated proprietary product only available from SPARK Stack A Stone NZ. Always follow the manufacturer's instructions.
- 6.To lay stones, place corner stones first (if applicable). Simply apply a light skim coat to the wall using a notch-trowel, then butter the back of the stone and press firmly onto the wall.
- 7.SPARK Stack A Stone can be cut with any diamond masonry blade attached to a drill, skill saw, angle grinder, bench saw, etc. Please observe safe operating procedures.
- 8.Once corner stones are in place, fill the spaces in between with flat stones. It may be helpful to mark the wall with a chalk line to help with straight and level placement of the stones. Avoid getting adhesive onto the surface of the stones.
- 9.Where stone crosses a control joint, mortar should be applied to the longest side of the stone only and mortar should not cross the join in the substrate.
- 10.All stone must be sealed using SPARK Stack A Stone Sealer. This is the only suitable sealer and is a proprietary product only available from SPARK Stack A Stone NZ.
- 11.Once finished, clean up and admire your work.
